Description

- High grade, high temperature stainless steel and billet aluminum components for the best in strength, style and functionality at an affordable price
- A 347 stainless investment cast valve body to provide consistent performance without fatigue or failure while also allowing for accurate boost control
- An internal Nickel Chromium Alloy valve
- 5 different 17-7 precipitation hardened springs for further adjustment of boost levels
- Standard bolt-style flange configuration for easy mounting
- A satin black anodized finish with 6061 aluminum billet cap
- Stainless steel inlet and outlet flanges as well as all clamps necessary for installation

The PTE PW39 external wastegate is designed to be a direct fit replacement for other units on the market and is compatible with most aftermarket manual or electronic boost controllers for ease of use.
