Description

We are excited to present our latest update, the C2NER v2 touchscreen! Originally released in Golf R application only, we have now expanded our handheld programmer to include the most popular VAG engines including 24v 2.8L

Now supporting the most popular Bosch ECUs: ME7.1.1, ME7.5.5, ME9.1, MED9.5.10, TFSI, ME9.5 FSI, MED9.1, MED9.1.5 TFSI, MED9.5 FSI and Diesel EDC 15/16.

One of the exciting new features of our C2NER packages is that it now includes the option for 2 FREE revisions instead of a 2nd file. Consider these "tweaks" to really dial in your tune remotely!!!

Improvements include:

- Better throttle response
- Better mid-range power
- Improved overall drive ability
- Increased rev limiter to 7200rpm
- Deleted speed governor
- Secured off-idle control
- Optimum A/F ratios

Race Version

This performance FLASH allows for the use of [Hi Flow CAT](#), and Cold Air Intake.

Street Version

This a performance FLASH that retains 100% of your cars emissions equipment. You must not alter the factory emissions in order to use this software or you will get a Check Engine Light (CEL). This version is [Hi Flow CAT](#) compatible.

***If ordering a C2NER device with your software, your ECU MUST be stock.**

If you you currently have other performance software on your ECU, we can flash it back to stock but you must send it in.*
